

SURVEY DATA SERVES DELAWARE STUDENTS

When you know their behaviors, you know how to help.

Reliable data can be used to improve high school students' lives. The Delaware Youth Risk Behavior Survey (YRBS) measures the progress our schools are making in key behavioral areas. YRBS data is generated from student surveys conducted every other year (odd years). This data helps state agencies determine what interventions may be needed and which resources should be allocated. YRBS data also helps agencies identify emerging issues, evaluate programs, and request grant funding.

Stay up to date about the behaviors of Delaware high school students by reading the latest data below.

SUBSTANCE USE in 2023

14.4% of high school students consumed their first alcoholic drink before age 13.

11.6% of high school students tried smoking their first cigarette.

33.4% of high school students used an electronic vaping product.

MENTAL HEALTH in 2023

32.9% of high school students felt sad or hopeless every day.

17.4% of high school students seriously considered attempting suicide in the past 12 months.

Data based on 2023 Delaware YRBS.

Be sure your school participates in the Delaware YRBS.
